

Definitions:

- **Customer (Consumer):** A Customer (also referred to as a Consumer) is a natural person who purchases products for personal use only. Customers do not receive any rewards or bonuses and are not part of the network structure.

- **HN Influencer (Health Notion Influencer):** An HN Influencer is a contracted individual who can:
Refer customers to purchase products.

Earn a single-level commission based on the Product Points (PP) generated by purchases from directly referred customers.

Influencers are part of the Enrollment Tree, but not part of the Placement Tree.

To join the network and benefit from multi-level commissions, an Influencer must sign an Official Partner Agreement.

- **IOP (Independent Official Partner):** An IOP is a contracted individual who:

Earns direct referral rewards identical to Influencers.

Can also build a network of other Official Partners (Downlines).

Earns multi-level commissions through their network.

IOPs are part of both the Enrollment Tree and the Placement Tree.

- **Tree Structures**

1- Enrollment Tree: The Enrollment Tree represents the referral relationships within the Health Notion system — specifically, who introduced whom to the platform. This tree is built automatically based on the use of referral links and permanently records the referrer (enroller) of each individual at the time of their registration, so the Enrollment Tree is permanent and non-editable.

2- Placement Tree: The Placement Tree is the structural representation of how Independent Official Partners (IOPs) are positioned within the network for the purpose of calculating team-based bonuses.

Each IOP can place a newly sponsored Official Partner at any position within their own downline in the Placement Tree — not necessarily directly beneath themselves. However, once placed, the structure is fixed to preserve line integrity and proper bonus calculations.

Example: If Partner A sponsors Partner B, they can choose to place Partner B directly under themselves, or under one of their existing downline partners (e.g., Partner C), depending on strategic needs.

This tree is used exclusively to calculate multi-level bonuses and includes only Independent Official Partners.

- **Referral Capabilities:**

1- HN Influencers can refer:

- Consumers (Customers)
- Other HN Influencers

2- Independent Official Partners (IOPs) can refer:

- Consumers (Customers)
- HN Influencers
- Other IOPs

Key Points: If an IOP refers an HN Influencer using their referral link, the Influencer will appear directly under the IOP in the Enrollment Tree. However, this does not determine their placement within the Placement Tree.

The Enrollment Tree includes HN Influencers, IOPs, and Consumers — and serves as the basis for calculating direct referral rewards.

- **Downline:** A Downline refers to the group of Independent Official Partners (IOPs) placed beneath another IOP in the Placement Tree. Influencers are not considered Downlines, even if they were referred by an IOP.
- **Upline:** The Official Partner who is directly above another partner in the Placement Tree.
- **Direct Referral:** An individual (consumer, Influencer or IOP) who was directly introduced to the system by another user. This relationship is recorded in the Enrollment Tree and determines direct rewards.
- **Referral Link:** A Referral Link is a unique, personalized URL assigned to each HN Influencer and Independent Official Partner (IOP) upon registration with Health Notion.

This link is used to:

- Invite new customers Influencers, or potential partners to the platform, and
- Track these referrals to determine eligibility for bonuses or rewards under the company's compensation plan.

Referral Links are tied to the Enrollment Tree, establishing who referred whom.

- **PP (Product Points):** "PP" refers to points assigned to products within our system. These points serve as a unit of value for rewards, bonuses, or internal accounting.
- **Assignment of PP:** Products are assigned PP based on their value, with a standard conversion rate of 1 PP per 1 Euro of the product's price, for Example, A product priced at €10 is assigned 10 PP.
- **GP (Group Points):** GP refers to the total PP (Points) accumulated from:
 - 1- The personal purchases made by an Independent Official Partner (IOP),

- 2- The sales made by the IOP to customers (Consumers) through their Referral Link,
- 3- The personal purchases made by their Downlines (other IOPs in their Placement Tree), and
- 4- The sales made by those Downlines to customers (Consumers) through their own Referral Links,

within the 30 days preceding the calculation date.

- **CP (Customer Points):** CP refers to the total PP (Points) accumulated from:

- 1- The sales made by an Independent Official Partner (IOP) to customers (Consumers) through their Referral Link, and

- 2- The sales made by their Downlines (other IOPs in their Placement Tree) to customers (Consumers) through their own Referral Links,

within the 30 days preceding the calculation date.

- **Calculation Date:** "Calculation Date" is the day on which the system calculates each partner's GP (Group Points) and CP (Customer Points).

This calculation happens every day.

For each day, the system looks at the activity from the previous 30 days, not including the current day.

As a result, each Independent Official Partner (IOP) has a new GP and CP value every day, based on the 30-day period leading up to that day.

Example: On April 22, 2025, the GP and CP values are based on all activity from March 23 to April 21, 2025.

- **QGP (Qualified Group Points):** QGP refers to the portion of Group Points (GP) that qualifies for bonuses or Tier advancement. QGP is calculated based on the company's specified rules, which include conditions such as Leg Max, Minimum PRS, and Minimum Number of Legs. These rules are outlined in the rules section and are used to determine the eligible qualified GP for each Official Partner.

The calculation is done daily, considering the GP and CP earned during the previous 30 days.

- **Daily Tier:** A Tier is a defined level or rank within the Health Notion system that determines an Official Partner's eligibility for daily bonuses, and rank advancement. Each tier has specific requirements, including a combination of Leg Max (maximum GP allowed from Directs), Minimum PRS (minimum sales to customers through the referral link), and the number of qualified Directs (Legs). The Official Partner's tier is determined by their total Qualified GP and whether they meet the conditions specified for that tier in the company's rules. Details are provided in Table 2.
- **Monthly Tier:** A Monthly Tier refers to the level or rank that an Independent Official Partner (IOP) achieves for a given month based on the number of days they were in a specific daily tier

or higher during the previous calendar month. To determine the Monthly Tier, the IOP must have been in a Daily tier or higher for at least 18 days of the previous month, and that tier is selected as their Monthly Tier. This Monthly Tier is used to determine eligibility for monthly bonuses.

- **Leg:** A Leg refers to a direct branch within an Independent Official Partner's (IOP's) Downline in the Placement Tree. Each Leg begins with a personally placed IOP and includes all other IOPs placed beneath that individual in a continuous line, regardless of the depth of the structure.

Legs are only defined within the Placement Tree and do not exist in the Enrollment Tree.

- **Direct:** Directs are IOPs who place on Level 1 of an individual's Placement Tree.
- **Indirect 1:** IOPs who are placed on Level 2 of an individual's Placement Tree (i.e., directly beneath the Directs).
- **Indirect 2:** IOPs who are in Level 3 of an individual's placement tree Tree (i.e., directly beneath the Indirect 1).

Official Partners' Compensation Plan

This compensation plan is designed with the goal of providing a clear and fair structure for official partners.

The Official Partners' Compensation Plan consists of three parts:

A: Reward Plan

B: Daily Bonus

C: Monthly Bonuses

A: Reward Plan

Description:

- This section operates based on the enrollment tree.
- The goal of this plan is to create a transparent reward system for Official Partners, focusing on introducing quality products to others.
- The reward plan is divided into three main sections, which are explained below.

1. Fast Reward Personal Sales (FRPS):

- When an official partner introduces customers through their unique referral link, they will receive 20% of the product points purchased by the customer as FRPS.
- Within specified time intervals, official partners can offer discounts to customers on their personal website. In this case, the reward percentage will be 20% minus the discount percentage provided. (The limitations of this percentage will be communicated to the independent official partner)

- Note: If the official partner makes a purchase themselves, they will receive a 20% discount. This discount applies exclusively to purchases made by the official partner for personal use.

2. Personal Sales Reward (PSR):

- An additional Reward is given for the total purchases made by customers referred by the official partner within a month.
- This Reward starts with a total purchase of 300 points and varies from 5% to 25% based on the volume of purchases.
- Details of this Reward are provided in Table 1.

Table 1: FRPS and PS Reward Rates

TOTAL PP	FRPS	PS Reward
0-299	20%	0%
300-1199	20%	5%
1200-2199	20%	10%
2200-3199	20%	15%
3200-4499	20%	20%
4500+	20%	25%

3. New influencer reward (NIR):

- If an official partner introduces a new influencer, the partner will receive 10% of the influencer's monthly income for the first 3 months.

How to pay:

1. **FRPS:** This reward is paid to the official partner 24 hours after the customer's purchase. (If the product is returned, this commission will be deducted from the partner's earnings.)
2. **PSR:** The Reward for the previous month is calculated and paid on the 16th of each month.
3. **NIR:** The Reward for NIR from the previous month is calculated and paid on the 16th of each month.

B: Daily Bonus

Rules:

- **Leg Max Rule:**
In each Tier, the contribution amount of GP from Directs for each Official Partner is limited to the amount specified in the "Leg Maximum" column of that Tier. If the GP from Directs is less than the "Leg Maximum" value, the actual GP from Directs is calculated.

- Minimum PRS Rule:**
 This rule relates to the minimum customer purchase through the referral link of Official Partners. To qualify for any Tier, the Official Partner must achieve at least the minimum sales amount specified in the PRS column through the referral link to customers.
- Minimum Number of Legs Rule:**
 This rule relates to the minimum number of qualified Directs required for each Tier. The Official Partner must have at least the minimum number of Directs specified in the "Min. Leg" column to qualify for any Tier.
- Access to Tier Rule:**
 To access a specific Tier, the total amount of qualified GP from Directs must exceed the specified amount for that Tier based on the "Leg Max Rule." The highest Tier that meets this condition is considered the Official Partner's current Tier.
- 50.01% Rule:**
 This rule is one of the main conditions for earning Bonuses. According to this rule, at least 50.01% of the GP volume of an Official Partner must come from sales to customers. In other words, CP must be at least 50.01% of the total GP.

Table 2: Daily Bonuses

Daily TIER	Leg Max	Min. Leg	PRS	Daily Bonus
Member*			€150	
500**	400	2	€150	€2
1.5K	1050	2	€150	€6
5k	3000	2	€150	€20
10k	5000	2	€300	€40
15k	6k	3	€300	€60
20k	8k	3	€300	€80
35k	14k	3	€300	€140
50k	20k	3	€500	€200
100k	40k	3	€500	€400
150k	60k	3	€500	€600
200k	80k	3	€750	€800
350k	140k	3	€750	€1,400
500k	200k	3	€750	€2,000
1mm	300k	4	€1,000	€4,000
1.5mm	450k	4	€1,000	€6,000
2mm	600k	4	€1,000	€8,000
3.5mm	1.05mm	4	€1,000	€14,000

Explanatory Example with Rules:

Suppose an individual has 10,000 GP and two legs with 4,000 GP and 6,000 GP. To determine their Tier and daily Bonus, we review the relevant rules:

- Tier 10K Evaluation:

In this Tier, according to the Leg Max Rule, each leg can contribute a maximum of 5,000 GP.
Therefore:

- **Leg 1:** 4,000 (less than 5,000, so the full amount is considered)
- **Leg 2:** 5,000 (maximum allowed in this Tier)
Total: 4,000 + 5,000 = 9,000 (less than the 10,000 GP required for Tier 10K).
Due to non-compliance, we move to the next lower Tier, which is Tier 5K.

- Tier 5K Evaluation:

In this Tier, according to the Leg Max Rule, each leg can contribute a maximum of 3,000 GP.
Therefore:

- **Leg 1:** 3,000 (maximum allowed in this Tier)
- **Leg 2:** 3,000 (maximum allowed in this Tier)
Total: 3,000 + 3,000 = 6,000 (greater than the 5,000 GP required for Tier 5K).
As a result, the individual qualifies for Tier 5K.
- **Daily Bonus:**
Assuming compliance with other rules (such as the Minimum PRS Rule, number of legs, and 50.01% CP rule), the individual qualifies for Tier 5K and receives a Daily Bonus of 20 euros.
According to Table No. 2, which will be explained later regarding this bonus model.

- Result:

- **Tier:** 5K **QGP:** 6,000 **Daily Bonus:** 20 euros

Explanation:

- The daily Bonus is calculated based on the placement tree.
- In calculating this Bonus:
- The GP (total PP of sales made in the past 30 days up to the calculation date, related to the Down lines of an official partner) is calculated daily.
- The Tier and QGP are determined based on the relevant rules.
- Then, the daily Bonus is assigned to the official partner according to Table 2.
- QGP and daily Bonus calculations are done daily.
- As the official partner's Tier increases, the amount of the daily Bonus also increases (according to Table 2)

Important Note:

- According to Table 2, only official partners who are at least in Tier 500 or higher are eligible to receive the daily Bonus.

How to pay:

- The daily bonus for each day is calculated 15 days after that day (due to the possibility of product returns). For example, the daily bonus for November 1st is calculated on November 16th, but the sales from the 30 days prior to November 1st are considered for calculating the QGP.
- The daily bonuses can be redeemed on the 1st and 16th of each month.

C: Monthly Bonuses

Explanation:

- The monthly Bonus is calculated based on the placement tree.
- The monthly Tier of each official partner is calculated on the 16th of the following month. This calculation is based on the number of days the official partner was in a specific Tier or higher during the previous month. The number of days must be at least 18:
 - For example: If in November:
 - 4 days in Tier 10k
 - 6 days in Tier 15k
 - 8 days in Tier 35k
 - 12 days in Tier 50k Then, the monthly Tier for this official partner in November will be 35k, because they were in 35k or higher for at least 18 days.
- Based on Table 3, the official partner receives a specific percentage of the total daily Bonuses from the previous month for direct and indirect 1 and indirect 2.

Table 3: Monthly Bonuses Percentage

Monthly TIER	from the total daily bonuses of their Directs	from the total daily bonuses of their Indirect1	from the total daily bonuses of their Indirect2
Member*	10%		
500**	15%		
1.5K	20%		
5k	25%		
10k	25%	4%	
15k	25%	6%	
20k	25%	7%	1%
35k	25%	8%	2%
50k	25%	9%	3%
100k	25%	10%	4%
150k	25%	11%	5%
200k	25%	12%	6%
350k	25%	13%	7%

500k	25%	13.5%	7.5%
1mm	25%	14.0%	8.0%
1.5mm	25%	14.5%	8.5%
2mm	25%	15.0%	9.0%
3.5mm	25%	15.5%	9.5%

Important Notes:

1. Official partners do not need to reach Tier 500 or higher to receive the monthly Bonus. They can receive 10% of their direct daily Bonuses from the beginning.
2. To receive a monthly Bonus from non-direct 1, they must reach at least Tier 10k or higher.
3. To receive a monthly Bonus from non-direct 2, they must reach at least Tier 20k or higher.

How to pay:

- On the 16th of each month, the monthly Bonus for the previous month is calculated, and official partners can redeem it.

HN Influencer Compensation Plan

A: Reward Plan

1.1 Description:

- This plan is based on the enrollment tree.
- The goal of this plan is to create a transparent reward system for influencers, focusing on introducing quality products to others.
- The plan consists of three main sections, which are explained below.

1. FAST REWARD PERSONAL SALES (FRPS):

- When HN Influencers refer customers to purchase products through their unique referral link:
 - o The HN Influencer receives 20% of the product points purchased by the customer, which is referred to as FRPS.
 - At certain time intervals, the option to offer discounts to customers up to a specific limit on the HN Influencer's personal website is available.
 - o If a discount is applied, the HN Influencer's percentage will be 20% minus the discount percentage(
- The limitations of this percentage will be communicated to the HN Influencers.
- **Note:** If the HN Influencer makes a purchase themselves, they will receive a 20% discount. This discount applies exclusively to purchases made by the HN Influencer for personal use.

2.PERSONAL SALES Reward (PSR):

- Based on the total points of customer purchases made through the influencer's referral link during a

month, the HN Influencer will receive a monthly Reward.

- The minimum points required to start receiving the Reward: 300 points.
- Reward percentage: Varies between 5% to 25% (according to Table 4).

Table 4: FRPS and PS Rewards

TOTAL PP	FRPS	PS Reward
0-299	20%	0%
300-1199	20%	5%
1200-2199	20%	10%
2200-3199	20%	15%
3200-4499	20%	20%
4500+	20%	25%

3. New influencer reward (NIR):

If an HN Influencer refers a new influencer, During the first 3 months of the new influencer's activity, the referring HN Influencer will receive 10% of the new HN Influencer's monthly income.

How to pay:

- **FRPS:** This reward is deposited into the HN Influencer's account 24 hours after the customer's purchase. (If the product is returned, this commission will be deducted from the partner's earnings.)
 - **PSR:** This reward is calculated on the 16th of each month for the previous month and can be withdrawn.
 - **NIR:** The Reward for NIR from the previous month is calculated and paid on the 16th of each month.
-

The Importance of Three Key Topics in Direct Sales

Our primary focus is on transparent sales and revenue generation through selling. In an environment where sales play a determining role, customer satisfaction and accessibility are recognized as one of the most critical factors for success. Considering these points, building strong relationships with customers is one of our top priorities. Concentrating on the following three areas will undoubtedly help us achieve our goals:

Attracting and Retaining Customers:

In today's competitive market, building lasting relationships with customers is of utmost importance. Customers expect businesses to deliver value and flexibility in their services. Flexible discount programs are an effective tool in this regard. Our strategy for attracting and retaining customers includes offering special discounts at specific times for frequent purchases. These discounts are designed to be flexible, allowing individuals to attract customers by offering high-quality products. This ultimately increases customer satisfaction and loyalty. These discounts are not part of this plan and will be applied periodically.

Developing Influencers:

Influencers play a vital role in the future success of sales. While capturing their attention can be challenging, we believe the solution lies in creating transparent and trustworthy relationships through fostering a culture of reliability. Influencers must receive transparent and fair rewards and bonuses for their efforts without any complexity in calculations. Therefore, we have designed a simple and transparent compensation plan to reward these individuals, enabling them to easily promote our products. They will receive a specific percentage of the customer purchases generated through their referrals. This model is especially suitable for those who prefer not to create complex networks but want to leverage their communication and sales skills effectively.

Leadership Development:

In the realm of leadership, authenticity and natural leadership progress must be tangible. True leadership means inspiring others to achieve their goals, not just pursuing personal success. Therefore, to strengthen this approach, Bonuses, incentives and rewards must be tied to encouraging and supporting others on their path to success. In this regard, we have designed our compensation plan to effectively motivate individuals. These rewards and Bonuses are provided daily and monthly based on the achievements of individuals in earning points. The more points individuals collect, the greater their chances of receiving additional rewards and Bonuses, aligning with our commitment to motivating and reinforcing their achievements. Leaders should not remain distant from the sales environment by merely managing their networks. Instead, they must understand and address their team's challenges. To manage this, specific rules have been incorporated into our plan.

Our Approach to Direct Sales:

In the past, sales involved individuals who directly purchased and distributed products. However, the future of sales will rely more on referral marketing. In this model, companies act as “distributors,” and participants use their social networks and personal connections to increase sales.

We are currently at a critical juncture where some people still follow traditional methods while others pursue innovative approaches. Companies that respond positively to these changes will undoubtedly perform better. In our new compensation plan, we have made significant structural changes, replacing traditional methods with modern concepts. We have prioritized complete transparency and simplicity in calculating rewards and Bonuses. Additionally, there is no mandatory monthly personal purchase requirement, allowing individuals to remain active without the need for periodic personal purchases. The only requirement for individuals is maintaining monthly sales to consumers.

These changes enable participants to earn income based on their performance in selling products, sustaining their activities without pressure or specific obligations.

Stress-Free and Pressure-Free Income Generation:

Viewing official partners as customers raises an important question: What motivates them to purchase? Genuine purchases occur when individuals perceive real value in the product's price. However, if the motivation to purchase stems from the compensation plan, the buying process becomes a form of “paying for participation” rather than “value exchange.” Authentic purchases happen when the product is bought for its intrinsic value, not for earning rewards and Bonuses.

Our compensation plan is specifically designed to address this challenge. Personal mandatory purchase requirements for official partners have been eliminated, and the classification of official partners into “active” and “inactive” statuses based on monthly personal purchases has also been removed.

The goal of these changes is to encourage greater participation without the stress caused by monthly personal purchase obligations. Our focus is to enable official partners to improve their performance without any pressure and to concentrate on selling.

Additionally, many individuals feel stressed and concerned due to the complexity of compensation plans, worrying whether they have received their commissions correctly. The simplicity of our compensation plan calculations eliminates these concerns, allowing official partners to easily calculate their commissions.

We firmly believe that selling to real customers should remain the primary focus, and encouraging bulk sales to official network partners should be avoided. To this end, we have implemented a rule that requires official partners to consistently include direct sales to customers in their plans. This action aims to create a sustainable and reliable sales system.

Focusing on sales to real customers and providing high-quality products will establish a reputable and trustworthy brand for us. As a result, this will help attract new customers and boost sales.

Utilizing Gamification and Point Scoring as an Innovative Approach:

Gamification is an engaging and participatory method that can strongly captivate individuals. In our compensation plan, a points-based evaluation system has been introduced as a novel way to assess the performance of official partners.

Instead of using traditional ranking systems, our goal is to introduce points that increase the attractiveness of the compensation plan while simplifying the complexities associated with achieving high scores. In this gamification system, official partners can collect more points daily, progress to higher levels, and earn more rewards and Bonuses based on their achievements.

This approach makes the sales process more exciting and challenging for official partners, stimulating them to continually improve their performance. This points system operates daily, allowing official partners to track and improve their scores as needed.

This system encourages continuous effort to earn daily Bonuses, motivating official partners to enhance their performance. Additionally, it helps them improve daily sales performance without worrying about temporary sales declines.

Daily bonus calculations allow official partners to have continuous opportunities for compensation while preventing the accumulation of sales in a specific time frame. Thus, sales are evenly distributed throughout the month.

Rewards, Bonuses and Incentives Based on Individual Performance and Potential

Rewards, Bonuses and incentives should be distributed fairly, based on individual performance and potential. Some reward systems, such as pooled reward systems, are often unfair and fail to accurately reflect each individual's efforts and achievements. Therefore, compensation programs should directly reward individuals based on their accomplishments and competencies.

Our compensation plan is designed to allow people with different skill sets to earn income. It is not limited to leadership or team-building skills. Even an official partner who introduces just one individual with strong leadership and networking abilities can earn a significant income. This plan acknowledges the efforts of the official partner and ensures they are rewarded for the success and income of the individual they introduced. Thus, this model ensures that everyone, regardless of their leadership position, can earn appropriate rewards or Bonuses by introducing high-potential individuals and maintaining direct sales to consumers.

Additionally, for individuals who are not interested in building a network, our compensation plan offers the opportunity to earn income through direct sales. Those who may not have strong leadership or team-building skills but excel in sales can earn income directly by selling products.

Our compensation plan is structured to motivate all participants, regardless of their skill levels, to contribute and increase sales. This approach enables individuals to earn income proportional to their abilities without needing to compare skill levels. It ensures fairness by allowing everyone to earn through direct sales or networking based on their skills and preferences.

As a result, our compensation plan provides various commission structures based on individual activities and potential, including direct sales, leadership, and network development. This structure ensures that individuals can earn based on their abilities and efforts in any area. The flexibility of this compensation plan allows individuals to choose an optimal strategy for generating income while providing opportunities for those capable of expanding their sales network to earn even more. This approach reflects the principle that each individual's rewards and Bonuses depend on their abilities and efforts.

Eliminating Specific Titles for Individuals:

In our approach, we support the removal of specific titles or designations that give individuals distinctive identities. We believe such traditional practices can divert attention from the main focus of sales. Our perspective emphasizes that modern business practices should not revolve around awarding grand titles or prominent names, as this could shift attention away from authentic sales transactions, leading to sales lacking genuine value exchange. Our compensation plan heavily prioritizes the direct sale of quality products and places real sales above earning titles or ranks. The key principle is to provide valuable products to our official partners so they can honestly sell these products to consumers.

Simplifying Leadership Complexities:

Our goal is to simplify conditions for leadership in direct sales businesses. Unlike some companies, we avoid imposing heavy and complex qualifications that might result in the loss of income for minor reasons. Such complexities can act as "glass ceilings," creating invisible barriers to progress. We believe that complicated requirements for leadership roles can discourage potential leaders and hinder their advancement. Moreover, complex structures may deter enthusiastic individuals from joining our direct sales business. Therefore, instead of creating these obstacles, we have designed a simple and transparent compensation plan to facilitate easy participation without unnecessary complexities. Our aim is to make it easy for people to join the business and achieve success without facing complicated hurdles.

The Crucial Role of Training in Improving Mindsets:

Training plays a vital role in shaping people's mindsets, as we aim to create a system that prioritizes selling high-quality products to real customers. This distinguishes our approach from certain direct sales models that may raise doubts in some cases. Our system is dedicated to the fundamental principles of direct selling and offering superior products, with a strong emphasis on training. Through comprehensive training in areas like product knowledge, sales techniques, networking skills, communication, and marketing, we equip individuals with the tools needed to achieve success. This training not only provides the necessary skills and knowledge for personal and professional growth but also helps improve their quality of life. Our goal is to change perceptions of direct sales and guide individuals toward an honest and effective approach to marketing and distributing quality products through practical educational content. This initiative can build trust in our system and contribute to

sustainable business growth. Adhering to principles of transparency and ethical values, along with offering premium products, allows us to build lasting trust in the market.
